

RECENS®

Create and connect your Golden Message

A clear step-by-step guide for creating your message, saving it securely and writing the final link to the NFC chip.

Before you begin

You need	A smartphone with internet access, your personal RECENS® e-mail link, and the audio, video, photo or text you want to use.
For the NFC step	An NFC-compatible smartphone and the NFC Tools app. Keep the final RECENS® link ready to copy.
Best experience	Open the RECENS® link on your phone. Complete the process in one sitting and do not close the page before the message is saved.

Important	Your personal link is connected to your order. Do not share it publicly.
------------------	--

Part 1 - Create your message

After purchase, open the button in your RECENS® order e-mail. You should arrive directly on the page titled “Record a personal voice message”.

1

Open your personal RECENS® link

Tap “Open your Golden Message page” in the order e-mail. The page should open directly in your browser.

2

Add a written message (optional)

In “Your message”, type your wishes, dedication or personal text. You may leave this field empty if you only want audio, photo or video.

3

Choose your voice recording

Tap “Choose voice file”. Select an audio greeting already recorded on your phone.

4

Add a photo or short video (optional)

Tap “Choose photo” or “Choose short video” and select the file from your phone.

5

Save your Golden Message

Check that the correct files are selected. Then tap “Save message”. Wait until the page confirms that the message has been saved and shows the final link.

Do not close too early

Wait for the final confirmation. Closing the browser before saving may interrupt the upload.

Part 2 - Write the final link to the NFC chip

Only complete this section after the portal has saved your message and displayed the final RECENS® link.

1

Copy the final RECENS® link

On the confirmation page, tap the final link and choose Copy. Keep the browser page open until the NFC test is complete.

2

Open the NFC Tools app

Use NFC Tools on an NFC-compatible smartphone. Choose the option to create a new URL / Website record.

3

Paste the RECENS® link

Paste the complete link exactly as provided. Do not shorten, edit or remove any part of it.

4

Write the link to the chip

Tap "Write". When prompted, hold the NFC area of your phone directly against the RECENS® chip and keep it still until the app confirms success.

5

Test the gift

Close NFC Tools. Tap the gift with the same phone. The RECENS® message page should open and display the saved content.

If the chip does not scan

Try a different position on the phone, remove the phone case and hold the phone still for 2-3 seconds.

Quick final check

The message is saved and the final link opens correctly.

The complete link was written to the NFC chip.

A test tap opens the correct RECENS® message.
